SKILLS

PRIVATE CLOUD

With 32+ Services and Adv. Tooling

Docker • Nginx • CI/CD

LANGUAGES

Over 5000: lines

Java • Python • TypeScript

JavaScript • C • C++ • HTML • CSS

FRAMEWORKS

Over 2000: lines

Apache Kafka • ReactJS • Spring Boot

Shedlock • NextJS • Shell Scripting

TOOLS/PLATFORMS

GCP • OCI • Microsoft Flow

PostgreSQL • MySQL • Git • Jenkins

EDUCATION

DR. APJ ABDUL KALAM TECHNICAL UNIVERSITY

BTECH IN ELECTRONICS & COMMUNICATION

Sep 2020 | Lucknow, India

Babu Banarsi Das National Institute of Technology & Management

CGPA: 8.62 / 10.0

CENTRAL ACADEMY SCHOOLS

Grad. May 2015 | Lucknow, India

COURSEWORK

GRADUATE

Cloud Computing | Machine Learning |

Open Source Software Engineering | AI

Integrations | Object-Oriented

Programming

UNDERGRADUATE

Operating Systems | Artificial Intelligence

+ Practicum | Unix Tools and Scripting |

Information Retrieval

WORK EXPERIENCE

CITI | FULL STACK JAVA DEVELOPER (ASSISTANT MANAGER)

July 2022 – Present | Pune, Maharashtra, India

- Designed and developed **Rippler**, a distributed AI-powered PR impact analysis platform for microservice ecosystems, enabling real-time LLM-based code change evaluation and automated downstream dependency detection, reducing manual impact analysis effort and improving production risk visibility across services.
- Contributed to a core-stream within **Citi Commercial Banking (CCB)**, engineering a distributed integration layer that unified CRM, digital banking, authentication, and treasury systems to automate user onboarding, streamline cross-platform data flows, and improve end-to-end client experience.
- Architected high-performance cache layers using **Hazelcast distributed clusters**, reducing critical API response times to sub-10ms and improving failover resilience under peak loads.
- Implemented circuit-breaking, retry, and fault-tolerance mechanisms using **Resilience4j**, preventing cascading failures and improving system stability during production incidents.
- Engineered distributed scheduled job coordination using **ShedLock**, ensuring single-execution guarantees across horizontally scaled services.
- Spearheaded Trade Commercial E-loans integration initiatives, driving measurable digital adoption and streamlining customer onboarding workflows.
- Led VM-to-cloud migration efforts with auto-scaling and load-based billing optimizations, reducing infrastructure costs and improving deployment agility.
- Built and launched **UserManagement Pulse**, a full-stack internal product (React, Node, Java microservices), independently owning end-to-end lifecycle from architecture to CI/CD deployment.
- Documented system architecture and operational playbooks using **Docusaurus**, improving debugging efficiency and cross-team self-service enablement.

CAPGEMINI | SENIOR SOFTWARE ENGINEER

Sep 2020 – Jun 2022 | Pune, Maharashtra, India

- Developed a scalable automated incident processor (**800 lines of TACL** *Tandem Advanced Command Language* used in DebitCard/Credit Card Txns) for **DISCOVER** Financial Services, **auto-closing 98% of incidents**, cutting dwell time to net zero. Full-stack contributions in ReactJS, Spring Boot, and PostgreSQL.

SUVASAA | REMOTE SOFTWARE ENGINEERING INTERN

May 2020 – Aug 2020 | Atlanta, GA, USA

- Full-stack development of an e-commerce platform using ReactJS and Firebase. Integrating online payments via Stripe API and managed segregated customer/admin routes.
